GRUPO CIFRE
Somos una sólida
compañía con más de
30 años de experiencia
en el sector cerámico.

Cifre Cerámica comenzó como una pequeña comercial que fue creciendo y evolucionando hasta crear sus propios productos y catálogo. Los propietarios de Cifre crearon sus propios centros de producción para garantizar la continuidad y la innovación de cualquier producto de Grupo Cifre.

Hoy en día contamos con tres centros de producción que producen 65.000 m² diarios y que dan trabajo a más de 300 personas. Cada centro de producción está especializado en formato y tipología de producto para garantizar la máxima eficiencia.

CIFRE GROUP
We are a solid company
with more than 30
years experience in the
ceramic tile sector.

Cifre Cerámica began as a small business that has grown and developed to the point of creating our own products and our own catalogue. The owners of Cifre created their own production centres in order to guarantee the continuity and innovation of any Cifre Group product.

Today we have three production centres manufacturing 65,000 m² per day, employing more than 300 people. Each production centre specialises in specific product types and formats in order to guarantee the maximum efficiency.

GROUPE CIFRE
Notre société est forte
de plus de 30 années
d'expérience dans le
secteur des carreaux
céramiques.

Cifre Cerámica a vu le jour comme une petite entreprise commerciale, mais sa croissance et son évolution l'ont menée à créer ses propres produits et à lancer son propre catalogue. Les propriétaires de Cifre ont créé leurs propres centres de production de manière à garantir la continuité et innovation de tout produit dont le Groupe Cifre.

Nous disposons actuellement de trois sites de production qui produisent 65.000 m² par jour et occupent plus de 300 travailleurs. Chaque centre de production est spécialisé dans un type de format et de produit afin de garantir une efficacité maximale.

Es la cerámica de tendencia, productos orientados al mundo contemporáneo y a diferentes posibilidades. Cifre Cerámica ofrece pavimento y revestimiento, tanto en pasta roja como en porcelánico para todos los espacios posibles.

Cutting edge tiles created with contemporary décor in mind. Cifre Cerámica offers red body and porcelain floor and wall tiles for every imaginable space.

Il s'agit d'une céramique tendance, de produits destinés au monde contemporain et offrant de nombreuses possibilités. Cifre Cerámica propose des carreaux de sol et de mur aussi bien en pâte rouge qu'en grès porcelainé et pour tous les espaces imaginables.

Es la línea seductora de Cifre Cerámica que recoge los mosaicos y las piedras naturales que dan forma a los espacios más especiales.

A seductive range from Cifre Cerámica featuring mosaics and natural stone effect tiles that give shape to the most special spaces.

Cette gamme séduisante de Cifre Cerámica comprend les mosaïques et les pierres naturelles qui donnent vie aux espaces les plus spéciaux.

ZENON

Cifre Group apuesta por la innovación tanto en diseño como en materiales. Zenon es la última revolución en soluciones decorativas y llega de la mano de Cifre Group.

Cifre Group supports innovation in design and materials. Zenon is the latest revolution in decorative solutions, brought to you by Cifre Group.

Cifre Group mise sur l'innovation en termes de design tout comme de matériaux. Zenon constitue la dernière révolution en matière de solutions de décoration, un pari lancé par Cifre Group.

**Estamos en
contacto**

En Cifre Cerámica nos gusta estar en contacto con nuestros clientes, contar nuestras novedades, y lo que hacemos cada día. Por eso hemos puesto en marcha múltiples canales que nos permiten comunicarnos diariamente con nuestros clientes. Ahora, gracias a Internet, puedes saber lo que sucede cada día en Cifre Group. Puedes consultar nuestra página web, nuestro blog o nuestra sala de prensa online. Puedes saber lo que nos inspira diariamente, conocer a los miembros de nuestro equipo o estar al día en la actualidad de la industria cerámica. Y, por supuesto, nos podemos seguir porque también nos gusta saber de nuestros clientes y colaboradores.

**We're in
touch**

At Cifre Cerámica we like to be in touch with our customers: we like telling you about our latest products, what we like and what we do every day. That's why we've set up a series of channels to keep us in touch with our customers on a daily basis. Now, thanks to the Internet, you can find out what's going on every day at Cifre Group. You can check out our website, our blog or our online press room. You can find out what inspires us each day, meet the members of our team, or keep up to date on the latest news from the ceramic tile industry. And of course, we can keep in touch, because we also like to know about our customers and collaborators.

**Restons en
contact**

Chez Cifre Cerámica, nous nous attachons à être en contact avec nos clients, leurs parler de nos nouveautés, de ce que nous faisons jour après jour. C'est la raison pour laquelle nous avons mis en place différents canaux qui nous permettent de communiquer quotidiennement avec nos clients. Grâce à Internet, il est possible de savoir tout ce qui se passe chez Cifre Group. Nous vous invitons à visiter notre site web, notre blog ou notre salle de presse en ligne. Vous y découvrirez ce qui nous inspire tous les jours, vous ferez la connaissance des membres de notre équipe et vous serez informé de toute l'actualité de l'industrie de la céramique. Et bien sûr, nous pouvons rester en contact, car nous aimons également recevoir des nouvelles de nos clients et collaborateurs.

RECOMENDACIONES DE LIMPIEZA Y MANTENIMIENTO: Para limpiar y mantener azulejos con esmalte metálico, se recomienda el uso de productos neutrales y no abrasivos. Hay que evitar detergentes, disolventes o productos ácidos que contengan ácido hidroclorídrico, cítrico o componentes abrasivos. No usar productos de limpieza tales como estropajos abrasivos que puedan rayar la superficie. Haga una prueba en una parte pequeña y no muy visible del azulejo antes de proceder con la limpieza total de toda la superficie.

RECOMENDACIONES: Para el uso correcto de nuestros productos, hay que tener en cuenta el sitio donde vayan a ser instalados. La junta mínima recomendada es de 1,5 mm; dejar menos espacio puede causar una acumulación de tensión entre los azulejos que no permita la correcta penetración del material de rejunte.

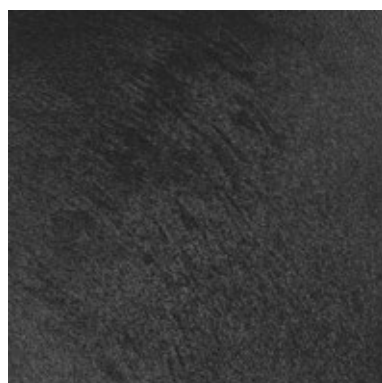

RECOMMENDATIONS FOR CLEANING AND MAINTENANCE: In order to clean and keep the tiles with a metallic enamel coating, it is recommended the use of neutral and non-abrasive cleaning agents. Avoid using detergents, scale solvents or acid products containing hydrochloric acid, citric acid or abrasive components. Do not use cleaning agents like abrasive scourers which might scratch the surface. Test a small and not highly visible section of the tiles before proceeding to clean the whole surface covered with these tiles.

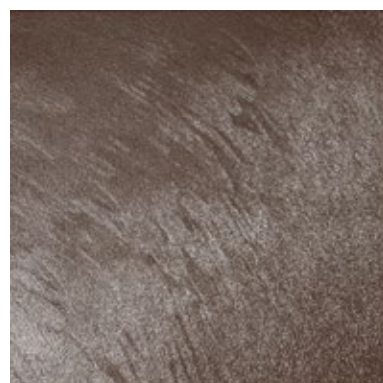

ADVISES ON HOW: For a correct use of our products it must be taken into account the place where they are laid. The minimum recommended space between tiles is set at 1.5 mm; smaller gaps might cause tension accumulation due to the contact between tiles and don't allow the correct penetration of the joining material.

RECOMENDACIONES DE LIMPIEZA Y MANTENIMIENTO: Para limpiar y mantener azulejos con esmalte metálico, se recomienda el uso de productos neutrales y no abrasivos. Hay que evitar detergentes, disolventes o productos ácidos que contengan ácido hidrocloreídrico, cítrico o componentes abrasivos. No usar productos de limpieza tales como estropajos abrasivos que puedan rayar la superficie. Haga una prueba en una parte pequeña y no muy visible del azulejo antes de proceder con la limpieza total de toda la superficie.
RECOMENDACIONES: Para el uso correcto de nuestros productos, hay que tener en cuenta el sitio donde vayan a ser instalados. La junta mínima recomendada es de 1,5 mm; dejar menos espacio puede causar una acumulación de tensión entre los azulejos que no permita la correcta penetración del material de rejunte.

RECOMMENDATIONS FOR CLEANING AND MAINTENANCE: In order to clean and keep the tiles with a metallic enamel coating, it is recommended the use of neutral and non-abrasive cleaning agents. Avoid using detergents, scale solvents or acid products containing hydrochloric acid, citric acid or abrasive components. Do not use cleaning agents like abrasive scourers which might scratch the surface. Test a small and not highly visible section of the tiles before proceeding to clean the whole surface covered with these tiles.

ADVICES ON HOW: For a correct use of our products it must be taken into account the place where they are laid. The minimum recommended space between tiles is set at 1.5 mm; smaller gaps might cause tension accumulation due to the contact between tiles and don't allow the correct penetration of the joining material.

Esta es solo una de las características que hacen tan especial a "Cifre Play", gracias al estudio de nuevas tecnologías Cifre nos ofrece ahora la posibilidad de que la cerámica cobre vida y varíe su aspecto según su exposición a la luz o a la oscuridad.

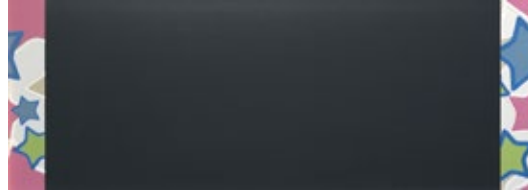

Esmalte luminiscente
Luminescent enamel

This is just one of the features that make "Cifre Play" so special. Thanks to research into new technologies, Cifre allows tiles to come to life and change appearance according to lighting levels.

Escala de destonificación

Shade variation program scale...

¿Que significa V1, V2, V3, V4 ?

La variación de tono o destonificación es inherente a todos los productos ceramicos. La destonificación y textura puede variar significativamente de una pieza a otra por el proceso de fabricación.

El tono V1 de destonificación tiene poco o casi ningún cambio respecto de una pieza a otra y el tono V4 tiene una gran destonificación o variación de color y/o cambio de textura de una pieza a otra.

Antes de cualquier colocación de azulejos debería comprobarse y ser aprobada por los clientes dicha variación.

No puede haber reclamaciones por textura o destonificación después de la instalación del material.

Por favor tenga en cuenta que los colores y destonificaciones pueden cambiar mucho, si usted realiza la comprobación en un monitor de ordenador.

Compruebe el material con una pieza física antes de realizar la decisión final o compra.

Destonificación:
Nº V1
Shade variation:

Slight

Destonificación:
Nº V3
Shade variation:

Moderada
Moderate

Destonificación:
Nº V4
Shade variation:

Considerable
Substantial

What does V1, V2, V3, V4 mean?

Shade variation is inherent in all tile products, including man-made tiles such as porcelain, glass&ceramic. Shade and texture will vary significantly from piece to piece to within production runs.

V1 shade variation has little or no change from piece to piece where a V4 will have a large variety of color and/or texture changes.

Prior to any installation, range of tiles should be approved by the customers. No claims for shade or texture variation will be honored after installation.

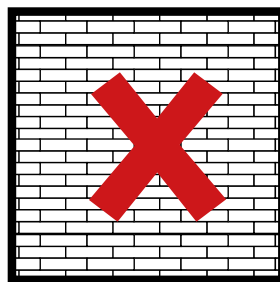

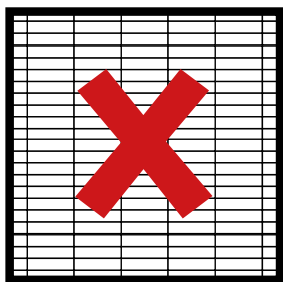

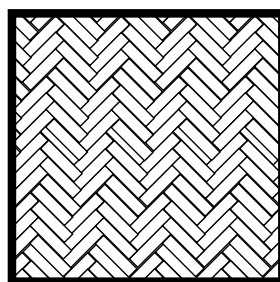

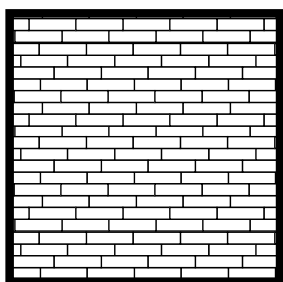

Please note shades of colours are seen differently on computer monitors and therefore customers should request a sample before making a final selection or purchase.

woodmotion

Esquema de colocación

La colocación de este material tiene que ser SIEMPRE en espiga o colocación a 1/3, NUNCA colocarlo en paralelo o a 1/2 pieza.

Installation layout

The laying out of this material must be always in Brickbone way or laid out to one third but NEVER laid out in parallel or half piece.

Plan de pose

C'est obligatoire de placer ces matériaux toujours en épi ou a un tiers, JAMAIS le mettre en parallèle ou a 1/2 pièce.

Verlegungsschema

Die Verlegung dieses Material muss immer ein Drittel verlegt werden, NIE im Fugenschnitt oder Halbverband.

СХЕМА УКЛАДКИ

Укладка этого материала должна производиться ТОЛЬКО елочкой или размешая на 1/3, НЕДОПУСТИМА укладка параллельно или размещение на 1/2

consejos de colocación

Para un uso correcto de nuestros productos, se debe prestar atención al lugar donde son utilizados. En este sentido, Cifre Cerámica s.l. para facilitar al comprador, indica en el catálogo general, enfrente de cada producto, símbolos de cada uno correspondientes a los 5 grupos en los cuales los materiales están clasificados.

La separación mínima aconsejable a dejar entre las baldosas es de 1,5 mm.; separaciones menores pueden provocar la acumulación de tensiones debido al contacto entre las baldosas y no permiten la buena penetración del material rejuntado.

Preparación del soporte

La colocación de baldosas cerámicas siempre debe ser realizada por personal profesional experimentado. Se puede emplear morteros de regulación o nivelación, incluso capas impermeabilizadoras, de drenaje, etc., si la situación lo requiere.

Las superficies deben estar totalmente limpias antes de aplicar el mortero de agarre o adhesivo.

Elección del adhesivo y sistema de colocación

La elección del adhesivo viene definida por el tipo de baldosa cerámica (el grupo al que pertenece y el formato), por el tipo de superficie a revestir (material) y por el uso del recinto.

La elección del sistema de colocación depende de la ubicación de la obra (exterior o interior) y de las dimensiones de la baldosa cerámica.

Se recomienda realizar doble encolado para baldosas que tengan alguno de

sus lados con una longitud superior a 30 cm. Esta técnica se realiza aplicando adhesivo tanto en el soporte como en la baldosa, cubriendo toda la superficie de las mismas.

Se recomienda consultar con el distribuidor y seguir las instrucciones del fabricante.

Cuidados especiales durante la colocación

Debido a la retracción del mortero de agarre en fraguado, debe vigilarse las paradas de montaje, de tal manera que al reiniciarse el trabajo se preverá este salto de nivel.

Las baldosas rectificadas deben ser manipuladas con especial cuidado para evitar cortes en las manos y desconchados y despuntados en las baldosas. Utilizar crucetas o estrellas de tamaño adecuado según la junta para mantener la ortogonalidad del montaje.

En colocaciones trabadas o a contrapunta se recomienda que ésta no supere el 25% de la longitud del lado más largo.

El rejuntado

Existen varios tipos de juntas en una obra:

Juntas estructurales: están diseñadas para absorber los movimientos de la edificación y siempre deben respetarse. Pueden ser tapadas con perfiles adecuados y llenadas con materiales indicados.

Juntas perimetrales: en todas las uniones pared-suelo. El ancho mínimo será de 8 mm. y deben estar vacías o rellenas con material deformable. Son disimulables con el rodapié o el azulejo de pared.

Juntas de colocación: es la separación que se deja entre las baldosas. Se considera colocación con junta cuando la separación es mayor o igual de 3 mm. y separación sin junta cuando es menor de 3 mm. debiendo dejar siempre una separación mínima de 1,5 mm.

Antes de iniciar el rejuntado, esperar a que el mortero de agarre o el adhesivo esté totalmente endurecido.

Las juntas tienen que estar limpias y exentas de polvo y partículas.

Efectuar el rellenado o sellado de las juntas utilizando una llana de goma dura, sin dejar vacíos los desniveles.

Eliminar el exceso de junta de la superficie moviendo la llana diagonalmente a las juntas, cuando la mezcla esté todavía fresca.

Terminación de la obra

Limpieza de las juntas: respetando los tiempos del fabricante, limpiar con un trapo de hilo húmedo toda la superficie, incluido el rejuntado. Limpiar los restos de obra con productos adecuados. Consultar con el distribuidor y nunca emplear productos que contengan Ácido Fluorhídrico HF.

Protección de las superficies realizadas para evitar impactos, abrasiones, etc.

Se aconseja al colocar, mezclar las piezas de varias cajas. Verificar antes de colocar: tonalidad, calibre y clase. No se admiten reclamaciones referentes al material colocado.

laying recommendations

For a correct use of our products it must be paid attention to the place where are employed. In this sense, in order to facilitate the purchaser, Cifre Cerámica, s.l. indicates in the general catalogue, opposite to each product, symbols corresponding to each of the 5 wear groups in which their materials are classified.

The recommended minimum space between the tiles is set at 1.5 mm.; smaller gaps may cause tension accumulation due to contact between the tiles and not allow correct penetration of the pointing material.

Preparation for the tile setting

The laying of ceramic tiles must always be carried out by an experienced professional. A regulating or levelling mortar can be used, or even water-proofing or drainage layers, etc., if the situation requires it. The surfaces must be completely clean before applying the mortar or the adhesive.

Choice of adhesive and method of application

The choice of adhesive is defined by the type of ceramic tile (the group to which it belongs and its format), the type of surface to be covered (material) and purpose of the tiled area.

The choice of tiling method depends on the location of the site (outside or inside) and the dimensions of the ceramic tiles.

It is recommended to use double the adhesive with those tiles which have one or more sides longer than 30 cm. This technique is achieved by placing adhesive both on the tile setter and on the tile, completely covering their surface.

It is recommended to contact the dealer and to follow the instructions of the manufacturer.

Special care during setting

Due to the retraction of the mortar during setting, one must watch carefully the pauses during setting, so that this change of level can be foreseen when restarting the work.

Tiles that have been rectified must be handled with especial care in order to avoid cuts to the hands and chipping and breaking to the edges of the tiles.

Use crosses or stars of the appropriate size according to the joint, in order to maintain the orthogonality or the setting.

It to be set in a brickwork style or at a counterpoint, it is recommended not to surpass 25% of the longest side.

Grouting

There are various types of joints in a site:

Structural Joints: these are designed to absorb movements in the building and must always be respected. They can be covered with adequate profiles and filled with the indicated materials.

Perimeter Joints: all joints where the wall meets the floor. The minimum width will be 8mm. and must be empty or filled with a deformable material. They can be concealed with the skirting board or the wall tile.

Setting Joints: These are the spaces left between tiles. The setting will be considered to have a joint when the space between each tile is greater than or equal to 3 mm. For spaces of less than 3mm, there is considered to be no joint. There should always be a minimum gap of at least 1.5 mm.

Before starting to apply the grout around the tiles, ensure that the mortar or adhesive is completely hard.

The joints must be completely clean and free from dust and particles.

Retail or seal the joints with grout using a grout float of hard rubber, without leaving spaces or uneven levels.

Remove any excess grout from the surface by moving the grout float in a motion diagonal to the joints, while the mixture is still fresh.

Finish the job

Cleaning the joints: respect the times advised by the manufacturer, clean the whole surface with a damp linen cloth, including the grout.

Clean the rest of the site with the appropriate products. Contact the dealer and never use products that contain Hydrofluoric Acid HF.

Protect the surfaces already set against impacts, abrasions, etc.

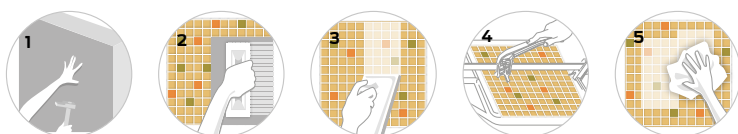

It is advised on having placed o mix pieces of several boxes. To check before placing the tonality, the calibre and the class. Are not

admitted claims relating to the placed material.

Captive[®]
by Cifre

consejos de colocación

El objetivo de estas instrucciones es garantizar la óptima colocación de las diferentes piezas.
Confíe únicamente en profesionales cualificados para llevar a cabo esta tarea.

1- Preparación de la superficie:

Es fundamental que la superficie esté bien preparada, ya que esto puede influir en el resultado y acabados finales. No hay que olvidar:

- Eliminar suciedad y restos de polvo, aceites, etc.
 - Garantizar la estabilidad del soporte.
 - Comprobar que el nivelado de la superficie es el correcto.
- En el caso de detectar desviaciones superiores a los 3 mm, se recomienda aplicar una capa de regularización con productos específicos y picar las irregularidades salientes.
- Asegurar que la superficie está seca, con un máximo de un 3% de humedad contenida.

2- Colocación

Es importante tener en cuenta varios factores antes de comenzar la colocación del material *Captive* by Cifre, como la planificación de las piezas para evitar cortes en el mosaico.

Para colocar el mosaico, recomendamos el uso de adhesivo cementoso de altas prestaciones, especialmente indicado para la colocación de mosaico vítreo y gres porcelánico.

Emplearemos una llana dentada y utilizaremos su lado liso para extender el cemento-cola uniformemente sobre el muro y 'peinaremos' entonces el adhesivo con el lado dentado (dentadura mínima de 3 mm). Es importante controlar la superficie sobre la que se aplica el adhesivo, ya que un exceso puede terminar provocando que se reseque el material.

Después de colocar la malla, debe presionarse con una llana de goma y asegurar que la distancia entre cada malla es igual a la distancia entre las piezas de una misma malla. Se debe dejar secar el cemento-cola durante 24 horas y posteriormente se procede al rejuntado.

Tratar con cuidado las mallas debido a que pueden contener elementos sensibles al rayado, tales como el cristal, aluminio y pintados a mano.

3- Rejuntado

Todas las piezas colocadas deben estar completamente limpias y sin restos o residuos de polvo.

El amasado para las juntas se preparará de acuerdo con las instrucciones del fabricante para obtener una mezcla homogénea y cremosa, sin grumos ni burbujas. Se extiende entonces con la llana de goma y rellenando bien las juntas en toda su profundidad. Con la misma llana retiraremos el exceso de material, mientras que emplearemos una esponja o trapo para retirar los restos del material antes de que fragüe. Es importante realizar esta operación dos veces para garantizar la total limpieza, con 24 horas de tiempo entre la primera y la segunda limpieza.

No se deben utilizar productos abrasivos y alcalinos para eliminar restos de materiales de obra.

4- Limpieza

La limpieza diaria se realizará con limpia cristales y con jabones neutros. Posteriormente se utilizará una bayeta limpia y suave para evitar tanto las rayas como los despuntados. Se recomienda, además, aplicar un reparador o abrillantador de mármol sobre los mosaicos de cristal al menos una vez al año.

5- Servicio de atención a la colocación

Cifre cuenta con un servicio técnico que presta asesoramiento a los profesionales especializados a la hora de colocar el material. Estamos a su disposición para solventar cualquier duda respecto a la preparación, la colocación o los productos que debe utilizar.

Observaciones

En el caso de emplearlo como pavimento, hacerlo únicamente en zonas de poco tránsito por su baja resistencia al rayado y deslizamiento.

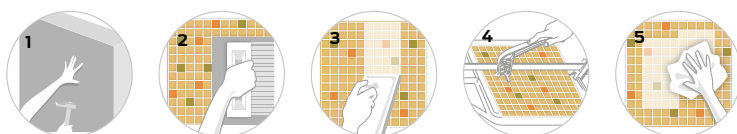

El cristal de *Captive* by Cifre está hecho a mano y, por tanto, son características las pequeñas variaciones en calibre y color. Por eso se recomienda verificar las piezas antes de la colocación.

En el caso de manipular el vidrio para cortarlo, hay que emplear los materiales especializados concretos.

Cautive[®] by Cifre

laying

recommendations

These instructions are intended to ensure that the various pieces are laid in the best possible way. Entrust this work only to qualified professionals.

1- Preparing the surface:

It is essential that surface is well prepared, as this can affect the final result and finish. Do not forget:

- to eliminate dirt and residues of dust, grease, etc.
- to ensure the base is stable.
- Ensure the surface is perfectly flat. If variations greater than 3 mm are found, it is recommended to apply a levelling coat of the appropriate product and cut back any protrusions.
- Ensure the surface is dry, with a maximum of 3% moisture content.

2- Laying

It is important to bear several factors in mind before starting to lay Cautive by Cifre, such as planning the pieces so as to avoid having to cut the mosaic.

To lay the mosaic, we recommend the use of high-performance cement-based adhesive, especially suitable for laying vitreous mosaic and porcelain tiles.

With a toothed float, use the straight edge to spread the tile adhesive uniformly over the wall and then "comb" the adhesive with the toothed side (minimum 3 mm teeth). It is important not to apply the adhesive to too large an area at a time, otherwise it may dry out.

After applying the mesh, press it with a rubber float and ensure that the distance between meshes is equal to the distance between pieces in the same mesh. The tile cement must be allowed to dry for 24 hours before grouting.

Treat the meshes carefully due to the fact they can contain sensitive elements to striped, such as crystal, aluminium and hand painted.

3- Grouting

All the pieces laid must be perfectly clean and free of residues and dust.

The grouting material must be prepared according to the manufacturer's instructions to obtain a smooth, creamy mix, without lumps or air-pockets.

It is then spread over the surface using a rubber float, completely filling the joints. Use the same float to remove excess material, while removing all residues with a sponge or cloth before it sets. It is important to perform this operation twice to ensure perfect cleanliness, leaving 24 hours between the two cleanings.

Abrasive and alkaline products must not be used to remove remains of materials of work

4- Cleaning

Routine cleaning is carried out using glass cleaner or neutral detergents. Then use a clean, soft cloth to avoid scratches and clouding. Furthermore, it is recommended to apply a marble treatment to glass mosaics at least once a year.

5- Laying help line

Cifre's technical advice service is ready to help specialised professionals when laying the material. We are available to answer any questions on preparation, laying or the products to be used.

Notes

The material should be used as a floor covering only in areas where there is little traffic, in view of its low resistance to scratching and slipping.

Cautive by Cifre is hand made, and so small variations in thickness and colour are characteristic of it. It is therefore recommended to check the pieces before laying.

In order to cut the glass, specific special equipment must be used.

normativa europea

"Clasificación de los azulejos cerámicos de acuerdo al grupo de pertenencia y a las normas específicas del producto".

Las normas UNE EN, acogidas por el CEN (Comité Europeo para la Normalización), se consideran válidas en toda Europa y comprenden todas las categorías de azulejos, prensados o extruidos, esmaltados y no esmaltados, de cualquier formato, únicamente de 1ª calidad. Las normas UNE EN están en sintonía con algunas modificaciones de las nuevas normas internacionales ISO y están formadas por:

Normas generales.

La nueva norma armonizada EN 14411, que facilita las definiciones, clasificaciones, características y requisitos de denominación para los azulejos de cerámica anula y sustituye a la norma EN 87.

La nueva normativa UNE EN 150 105454_1, que establece las reglas para la composición de la partida de muestreo y sustituye a la norma anterior EN 163.

Normas de producto.

Los azulejos cerámicos se dividen en grupos según el método de moldeo utilizado y el nivel de absorción del agua: Se distinguen 2 grupos A y B en función del método de moldeo

A - Azulejos extruidos

(Aquellos que se forman pasando la materia al estado plástico por medio de una "extrusionadora", que forma por una cinta que luego se corta de acuerdo con la medida deseada)

B - Azulejos prensados.

(Aquellos que se forman prensando la materia prima en polvo seco dentro de moldes especiales). Se trata de azulejos que se pueden esmaltar sucesivamente o dejar si esmalte. Los grupos se dividen a su vez en grupos secundarios de acuerdo con el nivel de absorción del agua (porosidad)

Grupo BIa = $E \leq 0.5\%$	UNE EN 14411 G ISO 13006 ANEXO G UNE -EN 14411 ANEXO G
Grupo BIla = $3\% < E \leq 6\%$	UNE EN 14411 J ISO 13006 ANEXO J UNE -EN 14411 ANEXO I
Grupo BIb = $0.5\% < E \leq 3\%$	UNE EN 14411 H ISO 13006 ANEXO H UNE -EN 14411 ANEXO H
Grupo BIlb = $6\% < E \leq 10\%$	UNE EN 14411 K ISO 13006 ANEXO K UNE -EN 14411 ANEXO J
Grupo BIII = $E > 10\%$	UNE EN 14411 L ISO 13006 ANEXO L UNE -EN 14411 ANEXO K

Las normas establecen por cada grupo de productos, las dimensiones, las tolerancias dimensionales, las características mecánicas, físicas y químicas, el aspecto y la denominación de azulejos cerámicos.

Normas para los métodos de prueba.

Dichas normas establecen los métodos para la determinación de las características dimensionales y de aspecto, de las propiedades físicas y de las propiedades químicas. Las normas 14411 se refiere a los métodos de prueba de las nuevas normas UNE EN ISO 10545

características técnicas

Sección SU 1 - Seguridad frente al riesgo de caídas

1 Resbaladizidad de los suelos

1. Con el fin de limitar el riesgo de resbalamiento, los suelos de los edificios o zonas de uso Sanitario, Docente, Comercial, Administrativo, Aparcamiento y Pública Concurrencia, excluidas las zonas de uso restringido, tendrán una clase adecuada conforme al punto 3 de este apartado.

2. Los pavimentos son clasificados de acuerdo a su resistencia al deslizamiento, según los establecido en la tabla 1.1:

Tabla 1.1 Clasificación de los suelos según su resbaladizidad

Resistencia al deslizamiento Rd Clase

Rd 15	0
15 < Rd 35	1
35 < Rd 45	2
Rd 45	3

El valor de resistencia al deslizamiento Rd se determina mediante el ensayo del péndulo descrito en el Anexo A de la norma UNE-ENV 12633:2003 empleando la escala C en probetas sin desgaste acelerado. La muestra seleccionada será representativa de las condiciones más desfavorables de resbaladizidad.

3. La tabla 1.2 indica la clase que deben tener los suelos, como mínimo, en función de su localización. Dicha clase se mantendrá durante la vida útil del pavimento.

Tabla 1.2 Clase exigible a los suelos en función de su localización

Localización y características del suelo	Clase
Zonas interiores secas	
- Superficies con pendiente menor que el 6%	1
- Superficies con pendiente igual o mayor que el 6% y escaleras	2
Zonas interiores húmedas, tales como las entradas a los edificios desde el espacio exterior (1), terrazas cubiertas, vestuarios, duchas, baños, aseos, cocinas, etc.	
- Superficies con pendiente menor que el 6%	2
- Superficies con pendiente igual o mayor que el 6% y escaleras	3
Zonas interiores donde, además de agua, pueda haber agentes (grasas, lubricantes, etc.) que reduzcan la resistencia al deslizamiento, tales como cocinas industriales, mataderos, aparcamientos, zonas de uso industrial, etc.	3
Zonas exteriores. Piscinas (2)	3

(1) Excepto cuando se trate de accesos directos a zonas de uso restringido.

(2) En zonas previstas para usuarios descalzos y en el fondo de los vasos, en las zonas en las que la profundidad no exceda de 1,50 m.

the european standard

"Classification of ceramic tile according to production method and specific grouping".

The UNE EN stands, adopted by the CEN (European Committee for standardization) are valid throughout Europe and apply to all types of first choice tiles, pressed and extruded, glazed and unglazed, of any size. The UNE EN standards are compatible with the latest amendments of the new ISO international standards, and include:

General regulations.

The new harmonised standard EN 14411 that provides definitions, classifications, features and designation requirements for ceramic tiles and cancel and replaces standard EN 87.

The new standard UNE EN ISO 10545_1 that sets forth the rules for the composition of sample lots, and replaces the previous standard EN 163

Product regulations.

Ceramic tiles are divided into groups according to how they are formed and their water absorption characteristics. In terms of forming methods, there are two groups: A and B.

A - Extruded tiles

(formed by means of passing a malleable paste through an extrusion machine; the resulting band is cut into the desired dimensions)

B - Pressed tiles

(obtained by pressing powdered raw materials in special molds). Afterwards, these tiles may be glazed or not.

The groups are broken down further according to their water absorption characteristics (porosity)

Grupo BIa = $E \leq 0.5\%$	UNE EN 14411 G ISO 13006 ANNEX G UNE -EN 14411 ANNEX G
Grupo BIla = $3\% < E \leq 6\%$	UNE EN 14411 J ISO 13006 ANNEX J UNE -EN 14411 ANNEX I
Grupo BIb = $0.5\% < E \leq 3\%$	UNE EN 14411 H ISO 13006 ANNEX H UNE -EN 14411 ANNEX H
Grupo BIIb = $6\% < E \leq 10\%$	UNE EN 14411 K ISO 13006 ANNEX K UNE -EN 14411 ANNEX J
Grupo BIII = $E > 10\%$	UNE EN 14411 L ISO 13006 ANNEX L UNE -EN 14411 ANNEX K

The regulations define the sizes, the size tolerances, the mechanical, physical and chemical properties, the appearance and designation of the ceramic tiles in each group.

Regulations for testing methods.

The regulations define the methods to be used for determining size and appearance characteristics, as well as physical and chemical properties.

Standard 14411 refers to the testing methods of the new UNE EN ISO 10545 Standard.

technical characteristics

Section SU 1 – Safety against falls

1 Slip resistance of floors

1. In order to limit the risk of slipping, floors in buildings or zones for Sanitary, Teaching, Commercial or Administrative Use, Car Parks and Public Areas, excluding areas of restricted use, will have a suitable rating as per point 3 of this section.
2. Floors are rated according to their Slip Resistance (Sr) as established in table 1.1

Table 1.1 Rating of floors according to their slip resistance

Slip Resistance Sr	Class
Rd 15	0
15 < Rd 35	1
35 < Rd 45	2
Rd 45	3

The slip resistance value (Sr) is determined using the pendulum method described in Appendix A of the UNE-ENV 12633:2003 standard, using Scale C on samples without accelerated wear and tear. The selected sample will be representative of the worst slip conditions.

3. Table 1.2 indicates the minimum class floors must have based on their location. This rating will be maintained during the useful life of the flooring material.

Table 1.2 Minimum class for floors based on their location

Location and floor characteristics	Class
Dry indoor areas	
- Surfaces with a slope of less than 6%	1
- Surfaces with a slope equal to or greater than 6% and stairs	2
Indoor areas subject to water , such as areas leading into buildings from outside (1), covered terraces, changing rooms, showers, bathrooms, toilets or kitchens.	
Surfaces with a slope of less than 6%	2
Surfaces with a slope equal to or greater than 6% and stairs	3
Indoor areas where, as well as water, there may be agents (grease, fat, lubricants) that reduce the slip resistance, such as industrial kitchens, abattoirs or industrial areas.	3
Outdoor areas. Swimming pools (2)	3

(1) Except for direct accesses to areas of restricted use.

(2) In areas designed for users who are barefoot and on the lower surface of pools, in areas where the depth does not exceed 1.5 metres

Conformidad a las normas accordance with standards conformément aux normes

Absorción de agua Water absorption	valor medio: $> 10\%$	cumple la norma complies with the standards
Norma: UNE EN ISO 10545.4		
Módulo de rotura Modulus of rupture	$> 15 \text{ N/mm}^2$	cumple la norma complies with the standards
Fuerza de rotura (N) Breaking strenght	$> 600 \text{ N}$	cumple la norma complies with the standards
Norma: UNE EN ISO 10545.7		
Resistencia a la abrasión Resistance to abrasion		a consultar según modelo to enquire according to the models
Norma: UNE ENV 1633:2003		
Resistencia al deslizamiento Slip resistance	a consultar según modelo to enquire according to the models	no se aplica not apply
Norma: UNE EN ISO 10545.4		
Dureza superficial Scratch resistance		a consultar según modelo to enquire according to the models
Norma: UNE EN ISO 10545.11		
Resistencia al cuarteo baldosas cerámicas Crazing resistance	no exigido not required	no se aplica not apply
Norma: UNE EN ISO 10545.12		
Resistencia a la helada Frost resistance	no exigido not demanded	no se aplica not apply

Características químicas / chemical features:

Norma: UNE EN ISO 10545.13		
Resistencia a los ácidos y bases Resistance against acids and bases	metodo ensayo disponible test method available	cumple la norma complies with the standards
Resistencia a los productos de limpieza y reactivos de piscina Household detergents and additives for swimmings-pools	clase B min. minimum Class B	cumple la norma complies with the standards

Porosa Pasta Blanca (Azulejos en monoporosa de pasta blanca) /
White body tile (single-fired porous white-body tiles)

Formatos / Formats: **29,5x90 / 11.5"x35.4"** - 30x60 / 12"x23.6"

Grupo: **BIII** (absorción de agua mayor 10%) / Group: **BIII** (water absorption greater than 10%)

Características físicas / physical data:

Ensayo / Test	Valor prescrito en norma / Value required	Valor medio / Average value
Norma: UNE EN ISO 10545.2		
Medida de longitud y anchura Length and width	desviación respecto medida de fabricación: $\pm 0.5\%$	cumple la norma complies with the standards
Medida del grosor Thickness	desviación respecto medida de fabricación: $\pm 10\%$	cumple la norma complies with the standards
Medida de la rectitud de los lados Measurement of side straightness	desviación respecto medida de fabricación: $\pm 0.3\%$	cumple la norma complies with the standards
Medida de la ortogonalidad Squareness	desviación respecto medida de fabricación: $\pm 0.5\%$	cumple la norma complies with the standards
Medida de la planitud de la superficie Measurement of flatness	desviación respecto medida de fabricación: $\pm 0.5\%$	cumple la norma complies with the standards
Norma: UNE EN ISO 10545.3		
Absorción de agua Water absorption	valor medio: $>10\%$	cumple la norma complies with the standards
Norma: UNE EN ISO 10545.4		
Módulo de rotura Modulus of rupture	$>15 \text{ N/mm}^2$	cumple la norma complies with the standards
Fuerza de rotura (N) Breaking strenght	$>600 \text{ N}$	cumple la norma complies with the standards
Norma: UNE EN ISO 10545.7		
Resistencia a la abrasión Resistance to abrasion		a consultar según modelo to enquire according to the models
Norma: UNE ENV 1633:2003		
Resistencia al deslizamiento Slip resistance		a consultar según modelo to enquire according to the models
Norma: UNE EN ISO 10545.4		
Dureza superficial Scratch resistance		a consultar según modelo to enquire according to the models
Norma: UNE EN ISO 10545.11

El contenido de este catálogo está protegido por la ley de Propiedad Intelectual, Real Decreto Legislativo 1/1996. Cualquier reproducción del mismo, en parte o en su totalidad, sin autorización expresa de CIFRE CERÁMICA, S.L. puede ser sancionada conforme el código penal.

CIFRE CERÁMICA S.L., se reserva el derecho de modificar y/o suprimir ciertos modelos, características o presentaciones de los modelos expuestos en este catálogo, sin previo aviso, por exigencias de producción sin que se contraiga derecho o perjuicio alguno.

Todas nuestras medidas estándar están sujetas a posibles variaciones por circunstancias de la producción.

Los ambientes que se muestran en este catálogo, son sugerencias decorativas de carácter publicitario.

Los colores y/o tonos de las piezas, pueden presentar ligeras diferencias respecto a las piezas reales. Es importante antes de la colocación comprobar que las piezas corresponden a los modelos y características de calidad, tono y calibre solicitados.

Debiéndose utilizar en la instalación real las instrucciones de colocación editadas por CIFRE CERÁMICA.SL.

The content of this catalogue is protected by the Intellectual Property law, Royal Decree Legislative 1/1996. Any reproduction in part or in its entirety, without express authorisation of CIFRE CERÁMICA, S.L. can be punishable under the penal code.

Due to production constraints, CIFRE CERÁMICA S.L. reserves the right, without prejudice, to modify and/or discontinue certain products or features, or vary the appearance of products in this catalogue, without prior notice. Statutory rights are not affected.

All standard measurements are subject to possible variation due to the production process.

The illustrations shown in this catalogue are representative only and for advertising purposes.

The colours and/or shades of items shown may differ slightly from the actual items. Before installation we strongly recommend you ensure all items delivered are as required in terms of product, quality, colour and calibre.

CIFRE CERÁMICA.SL fixing instructions must be followed at all times.

Le contenu de ce catalogue est protégé par la loi de propriété intellectuelle, royal décret législatif 1/ 1996. La reproduction d'une part ou de la totalité sans autorisation de CIFRE CERÁMICA peut être sanctionné par le code penal.

CIFRE CERÁMICA S.L., se réserve le droit de modifier et/ou de supprimer certains modèles, caractéristiques ou présentations des modèles de ce catalogue, sans préavis, pour des raisons de production, sans contracter aucun droit ou dommage.

Toutes les mesures standard peuvent faire l'objet d'éventuelles variations en raison des circonstances de production.

Les ambiances faisant partie de ce catalogue sont des propositions de décoration de type publicitaire.

Les couleurs et/ou les tons des pièces peuvent présenter de légères différences par rapport aux pièces réelles. Il est important de vérifier avant la pose que les pièces correspondent aux modèles et aux caractéristiques concernant la qualité, le ton et le calibre sollicités par le client.

Lors de la pose, les instructions de pose publiées par CIFRE CERÁMICA S.L. doivent être respectées.
